Caddock Precision High Voltage Resistors for Commercial and Industrial Applications

The NEW RoHS compliant MX500 Series Precision High Voltage Resistors were specifically developed for use in Commercial and Industrial High Voltage Applications. These resistors combine the proven performance of Caddock’s Micronox® resistance system with construction and operating specifications optimized for these general purpose applications. For demanding High Voltage Applications that require a wider operating temp. range or greater stability, we recommend Caddock’s Type MG Precision High Voltage Resistors or Type TG Low TC Precision High Voltage Resistors (capable of operating from -55°C to +125°C, with derating to +225°C).

Performance features of the MX500 Series Resistors are:
- Five Models with Voltage Ratings from 7.5 KV to 32 KV
- Resistance Range from 1 Megohm to 1,000 Megohms
- Temperature Coefficient: 80 ppm/°C, from 0°C to +70°C
- Resistance Tolerance: 1%
- Excellent Long Term Stability
- Non-Inductive Design
- The MX500 Series High Voltage Resistors utilize our well-proven High Temperature Silicone Conformal Coating
